

Online Invoice Creation API

E-commerce integration – Create Online invoice

Overview

The **Create Online Invoice API** enables external e-commerce and delivery partners to create **online sales invoices** in the POS system.

This API supports **home delivery, online payments, loyalty points, returns, and third-party logistics integrations**.

The endpoint receives a complete invoice payload including:

- Order header details
- Customer (consumer) information
- Delivery details
- Line-item (row items) details
- Payment and discount breakdowns

Once processed successfully, the invoice is created and registered in the POS backend.

1. Environment Details

- **Testing Environment (UAT)**
 - **Base URL:** "http://10.10.20.121:90"
 - **Endpoint:** "/Gateway/EcommerceIntegrationApi/api/Orders/CreateOnlineInvoice"
 - **HTTP Method:** "POST"

2. Authentication

- **API Key Authentication**

The API requires an API key to be passed in the request headers.

- **Header:** X-API-Key:
wK9mP3xR7nQ2tY8vL4jH6bN1cZ5fG0sA9dW3eT7uI2oP6mK1xV4yL8qR5nJ3hC0

3. Request Headers

Header Name	Type	Mandatory	Description
Content-Type	string	Yes	Must be application/json
X-Api-Key	string	Yes	Authentication key

4. Request Body Structure

The request body is a **JSON object** representing the online invoice.

5. Request Body – Field Definitions

a. Invoice Header

Field	Type	Mandatory	Description
ReferenceNumber	string	Yes	Shipment ID
OnlineOrderNumber	string	Yes	External e-commerce order number
IsReturn	boolean	Yes	Indicates if the invoice is a return
ParentReferenceNumber	string	Conditional	Parent Shipment ID Required when IsReturn = true
OrderCreationDate	datetime	Yes	Original order creation date

TotalDiscount	decimal	Yes	Total discount on invoice
TotalVat	decimal	Yes	Total VAT amount
GrossAmount	decimal	Yes	Sum of RowItems (Quantity × ItemPrice)
NetAmount	decimal	Yes	Final payable amount (GrossAmount – TotalDiscount + TotalVat + DeliveryFees)
CustomerName	string	Yes	Partner name one off (SMSAECOM, ARAMEX, REDBOX, OWNFLEET, NAQEL, TAMARA, TABBY, AMAZON, TRENDYOL)
CustomerCreditAmount	decimal	No	Credit applied to customer account Only mandatory if customer is AMAZON or TRENDYOL
PaidOnlineAmount	decimal	Conditional	Applicable only for AKNION
PaidWithPointsAmount	decimal	Conditional	Applicable only for AKNION

NOTE:

CustomerCreditAmount + PaidOnlineAmount + PaidWithPointsAmount

Must equal to NetAmount.

b. InvoiceConsumer Object

Customer personal information.

Field	Type	Mandatory	Description
FirstName	string	Yes	Customer first name
MiddleName	string	No	Customer middle name
LastName	string	No	Customer last name
ConsumerCode	string	No	Internal consumer identifier
Gender	string	No	Male / Female
BirthDate	datetime	No	Date of birth
PrimaryPhoneNumber	string	Yes	Customer phone number (9665xxxxxxxx)
Email	string	No	Customer email
NationalId	string	No	National ID
Nationality	string	No	Customer nationality

c. DeliveryDetails Object

Delivery-related information.

Field	Type	Mandatory	Description
DeliveryPhoneNumber	string	No	Contact phone number
DeliveryAddress	string	No	Delivery address
DeliveryLocationUrl	string	No	GPS coordinates
DeliveryNotes	string	No	Special delivery instructions
DeliveryFees	decimal	Yes	Must be full delivery fee or zero

d. RowItems Array

Each object represents a sold item.

Field	Type	Mandatory	Description
Quantity	decimal	Yes	Item quantity
MaterialNumber	string	Yes	ERP material code
ItemPrice	decimal	Yes	Unit price
ItemDiscount	decimal	Yes	Discount per item
RowTotalDiscount	decimal	Yes	Total discount for the row
ItemVat	decimal	Yes	VAT per item

RowTotalVat	decimal	Yes	Total VAT per row
BatchNumber	string	No	Batch number
ExpireDate	datetime	No	Expiry date
SerialNumber	string	No	Serial number
Barcode	string	No	Product barcode
ScannedCode	string	No	Scanned code from the scanner
GrossAmount	decimal	Yes	Quantity × ItemPrice
NetAmount	decimal	Yes	Final amount after discount + VAT
VatPercentage	decimal	Yes	VAT rate (e.g. 0.15)
OfferIdentifier	string	No	Promotion or offer reference

6. Business Rules & Validations

- DeliveryFees must always be provided (either full value or zero)
- ParentReferenceNumber is mandatory for return invoices
- VAT calculations must be **item-level accurate**
- GrossAmount, NetAmount, and VAT totals must mathematically align
- Duplicate barcodes are allowed when representing multiple quantities
- PaidOnlineAmount and PaidWithPointsAmount apply only for **AKNION**

7. Sample Request

- POST /Gateway/EcommerceIntegrationApi/api/Orders/CreateOnlineInvoice

Content-Type: application/json

X-API-Key: {API_KEY}
